(54) Title: METHOD OF ENABLING AN APPLICATION PROGRAM RUNNING ON AN ELECTRONIC DEVICE TO PROVIDE MEDIA MANIPULATION CAPABILITIES

(57) Abstract: Conventionally, media manipulation tools, such as tools for editing video, are an integral part of a video editing application. But with the present invention, these tools can be shared by any application that can generate a video window in which video can be played back. Hence, a conventional media player can now include video editing etc. functionality. Even more powerfully, any other application that can generate a video window, such as a presentation program, can now also be extended to include media manipulation tools.
